Please contact us on 01757 227 223 for further information. Dr. Andrew Charlesworth has been studying the art and science of Medicine for many years. He qualified as a General Practitioner in 1992 and has worked as a General Practitioner at Hillcrest Surgery and as a Private Practitioner in Herefordshire. He has taught medical students, doctors, pharmacists and nurses since the early 1990's. He has been involved with the World Patient Movement since its conception and was a founding member of the National British Academy of General Practitioners. He is now a recognised specialist in Medical Education and Cognitive

---

Behavioural Theory and has researched, written and lectured widely on the topic of medical language, medical education, medical professionalism and relationship building. He is a full member of the General Medical Council (GMC) and The General Dental Council. He is the author of the Doctor Patient Relationship series which are now published in more than twenty countries and translated into more than two dozen languages. He has produced a number of books on Medical Education, Medical Terminology, Medical Students and Medical language. He has acted as a consultant to the Faculty of Public Health Medicine. He has designed and taught new vocational qualifications for the Faculty. His work has been recognised by many award bodies and has been presented to and published by the World Medical Association, World Federation of Public Health Associations, International Society for Medical Education, Association for Medical Education, Europe, American Medical Association and The Lancet. He has been the subject of book reviews and television appearances for many years. Medical Terms and Symbols Koa with a patient at night. Dr. Charlesworth's view of a patient in his consulting room. The end of day for a patient at home. Dr. Charlesworth is also a keen photographer. Many of his photos have been published. Dr. Charlesworth in his consulting room with his computer and word processing equipment. Dr. Charlesworth is a prolific writer and you can see his titles at our author page. The English language has undergone many changes in recent years. The largest change in the language of medicine is the emergence of medical abbreviations in place of long medical terms. Medical abbreviations have to be learned like any other language and I hope these pages give a good insight into the world of medical abbreviations. But beware, there is still much to learn. The following is a list of abbreviations that should be familiar to anyone taking this course. I have also included a list of abbreviations that are often misused. 82157476af
