I am using Win 10 Pro and this game works fine, all you need to do is lower the screen res' to 1024x768x32 (ON YOUR MONITOR) then run the game and then tweak until you find the maximum OPTIMISED screen res - the game itself will tell you what is not optimised.

The hit detection values are woefully inaccurate for the weapons and this proves to be part challenging and very frustrating; the campaign itself is a little short however, this makes it a great FPS for first timers. I hope the developers will make further instalments featuring the Royal Marines Commandos as they are an amazing fighting unit that do not feature enough of their rich history of combat warfare!
